**Frontend Developer (Internship) at DrutoSoft.net (May-2024- running)** <https://www.drutosoft.net/>

I was responsible for the complete frontend sector of the company and my work was to convert Figma designs to robust React JS code that complied with the best practices of SEO and Scalability.

**Skills:** HTML5, CSS3, Bootstrap, Tailwind CSS, daisy ui, JavaScript (ES6), React JS, API Testing

## PROJECTS

**Ecommerce Project(Full Stack Project)** [Live Link](#) || [Client & Server GitHub Link](#)

*I have developed a dynamic e-commerce website using **HTML, Tailwind, React.js, Node.js, Express.js, Mongoose and other many tools**. The website comprises two main components: **User, and Admin panel**.*

### Project Highlights:

- User and Admin authentication for product management and user interaction
- Dynamic product search enabling users to find products by name.
- Category-based product displays with price range filtering for easy exploration

**Real State Project (Full Stack Project)**     [Live Link](#) || [Client Link](#) || [Server Link](#)

*I created a dynamic Real state website design using HTML, CSS(Tailwind), React JS, Express JS and MongoDB and other many tools. Sever-side code follows an MVC architecture model.*

**Project Highlights:**

- Real estate Project featuring firebase authentication and JWT token verification security
- Utilizing React Hooks, Axios, and a seek interface a modern user experience.
- Client contact functionality enabled via “mailto” within the contact function.

**Restaurant Food Project (Full Stack Project)**     [Live Link](#) || [Client Link](#) || [Server Link](#)

*I created a dynamic food factory website design using HTML, CSS(Tailwind), React JS, Express JS and MongoDB for a seamless shopping experience.*

**Project Highlights:**

- Seamless negative tailored dashboards for both admins and uses, ensuring personal experienced.
- Stringent JWT and Admin verification for security and effortless stripe payment integration.
- With a sleek interface and modern tack stack including React hooks, Axios interceptors, and React query, our platform ensures a delightful and secure online food buying experience.

**Dragon News Project (Full Stack Project)**     [Live Link](#) || [Client Link](#) || [Server Link](#)

*I created a responsive dynamic news channel website design, combining a cutting-edge tech stack that includes HTML, CSS(Bootstrap), React JS and Express JS and MongoDB*

**Project Highlights:**

- React Router used for Navigation and Bootstrap used All display responsive
- Implement a marquee to highlight breaking news and time sensitive updates
- Used React Moment to handle dynamic date format

**E-commerce Project (Full Stack project)**     [Live Link](#) || [Client Link](#) || [Server Link](#)

*I created a dynamic e-commerce website design using HTML, CSS, React JS, Express JS and MongoDB for a seamless shopping experience.*

**Project Highlights:**

- Stored user data efficiently using local storage
- Enhanced security with firebase user authentication
- Set up private routes for added user protection
